

Dear Hiring Manager,

I am drawn to the opportunity to join your team as an Infrastructure Specialist where my passion for creating efficient IT infrastructure solutions can contribute to your company's growth. Through exploratory research into your company's commitment to cutting-edge technology and innovation, I see a perfect alignment with my expertise and aspirations.

During my tenure as the Global Infrastructure Business Analyst with Intrum, I honed my ability to bridge the gap between business needs and IT solutions. One notable achievement was successfully conducting group meetings that brought together Project Managers, stakeholders, and technology specialists to streamline infrastructure demands. These initiatives transformed complex infrastructure requirements into actionable projects aligned with service objectives. In leading these workshops, I navigated diverse perspectives and generated consensus, ensuring that project proposals reflected both technical feasibility and strategic alignment with business goals.

Prior to this, while at Helphone servicios informáticos, I owned the IT infrastructure lifecycle, overseeing everything from planning and design to implementation and maintenance. My role integrated technical depth and leadership skills in managing a robust IT environment. This experience required technical expertise in systems like VMware and Hyper V, with an enduring focus on optimizing performance and reliability of IT services. Through effective vendor management, liaising with internal stakeholders, and handling sophisticated technology ecosystems, I cultivated the capacity to drive meaningful IT improvements.

The comprehensive understanding gathered from implementing backup solutions using Veeam at Viscofan over a wide-reaching VMware infrastructure underscores my technical proficiency. Ensuring data security and availability while managing these critical operations reinforced my dedication to upholding excellence in IT infrastructure delivery, continuing my technical education as Veeam Legend and VUG Leader, assisting others and keeping my knowledge via my blog and Lab.

I am eager to bring my experience to your team and further explore how I can contribute to enhancing your IT operational capabilities. Thank you for considering my application. I would welcome the opportunity to discuss how my background, skills, and enthusiasms align with the needs of your company.

Sincerely,

LUIS FREIXAS

Global Infrastructure Business Analyst
